Understanding the Tier System

Each of my editing services is available in three tiers: Light, Standard, and Premium. These tiers are designed to provide flexible support tailored to your manuscript's stage of development, your timeline, and your budget. Whether you're looking for a light polish or a fully collaborative experience, there's an option that fits.

- **Light Tier** is best for experienced or confident writers with clean, well-revised drafts who need minimal input, usually as a final check or gentle refinement.
- **Standard Tier** is my most popular option, offering a balanced, in-depth service for authors seeking a professional and polished result. It includes tracked changes, in-document feedback, and detailed commentary.
- **Premium Tier** is ideal for writers seeking extra support, quick turnaround, or a more collaborative experience. It includes revision follow-ups, priority communication, and personalised guidance.

Turnaround times and rates vary by tier to reflect the depth of feedback and level of involvement. The following pages outline exactly what is included at each level across every service.
